JANUARY 1943

No. 5

## Present and Post-War Considerations

[EDITORIAL]

PERSONNEL PROBLEMS in the junior college during the present crisis are most difficult to solve. We are all confused with the conflicting issues. No one knows what the morrow may bring. Students are faced with uncertainty and are strongly influenced by emotional appeals. They are in great need of the assurance that counselors cannot honestly give. We are compelled to accept the situation stoically and do the best that we can, holding to our faith that right will eventually win.

We are fighting to preserve what we call our democratic civilization. While doing this we must not neglect the teaching of the very fundamentals of that civilization. It is in no way disloyal to point out that in our "all out" efforts to win the war we may be developing a physical technology that will enslave us as it has Germany. While not diminishing this effort we must at the same time maintain a social and spiritual balance that will keep the control of the physical!

The youth of today must be equipped with a fund of essential information and idealism if they are to assume the responsibility of making the decisions with which they will be faced in the future regarding governmental and social policy. To do otherwise would mean the fall of democracy even assuming the winning of the war.

The junior college, free from the traditions and handicaps of the older colleges, has a rare opportunity and a challenge to provide through a core curriculum this essential information and idealism which will give the student a basis of judgment in meeting the economic, social, and political problems which he must face as fearlessly as our men in uniform are now facing the enemy around the battle-scarred world.

To be practical, such an integrated course is possible to program within one-half of the student's scheduled time. This course based upon the economic and social history of the United States should include our philosophy of life, the place of art and music in our culture, the contributions of all the sciences to health, family life and industrial progress, the contributions of other cultures to our own, and our place among the nations of the world. This is not as difficult as it sounds. It has been done with distinct success.

With this background for the preservation of our democratic civilization, the junior college can use the remaining half of the student's schedule to prepare him for his emergency service. Thorough testing in interests, aptitudes, and abilities will form the basis of guidance into that field to which he can make his greatest contribution.

—JESSE B. DAVIS

## They're in the Army Now

J. ROBERT SALA

**I** TEACH in one of the largest "junior colleges" in America—and the fastest growing. Its campus covers thousands of acres. Yet its course of study is one of the shortest. It is the San Antonio Aviation Cadet Center, a vast educational institution for the testing, placement, and pre-flight training of combat fliers. The largest unit of the Center is the Pre-Flight School for Pilots. What kind of school is it that will take over a great share of the training of American young men of junior college age, now that the 18-20's are to enter the armed forces? What is its philosophy of education, its program? Is there anything new that civilian junior colleges might use?

For many years junior colleges have talked a great deal about "equality of opportunity" for "all of the children of all of the people." The fact remains, however, that attendance at college was and still is conditioned on ability to pay. Even when an aspiring youth could get together enough money to pay for tuition and books, his income often could not be spared at home.

---

J. ROBERT SALA, like the title of his interesting article, is also "in the Army now." As a first lieutenant in the Air Corps, he is an instructor in the Army Air Forces Pre-flight School at San Antonio Aviation Cadet Center, Texas, having left the deanship of Christian College, Missouri, last summer to accept this commission. He had been dean of the faculty at Christian since 1936, and before that professor of history at Lynchburg College for two years. He holds a B. A. degree from Bethany College, an M. A. from West Virginia University, and a Ph.D. from the University of Chicago. For several years he has been secretary of the Missouri Association of Junior College Administrators, and in 1939 was also president of the North Central Junior College Association. He is co-editor of the publication, "Mental Health Observer."

Here, however, Uncle Sam pays each cadet \$75 a month, plus food, clothing, and shelter. All have the same opportunities and duties. All wear the same uniform, eat the same food, sleep in the same sort of bunks. Wealth and social prestige carry no weight. It is an unexpected but real answer to President Conant's plea for the subsidizing of youth who show capacity to absorb and use instruction. Boys are drawn from all over America. Army classification carefully sorts out those who show talent. Others are steered into military pursuits for which they are better fitted. Ability and application are the sole essentials for progress.

The Army schools enjoy at least one major advantage. They know what they are educating *for*. The objective is battle efficiency. Any course, any program that does not contribute to that end is not considered. The Army is spared any long-winded dissertations on the objectives of education. The end product is an efficient fighting man. That is not as narrow an objective as might seem at first blush. Many fundamentals of habit and character are as useful in peace as in war.

*Discipline* is the first and most important principle of the Army schools. Army instructors, enlisted from civilian colleges and universities, themselves go through a rigorous course of training and discipline before entering on their duties. After their classroom work begins, they are periodically visited by friendly, trained supervisors. With the cadets, discipline is strict, and there is much "spit-and-polish." Theorists will cry "Regimentation." Commanders know, however, that any kind of dis-

cipline that regiments makes a very poor soldier. Combat today calls for the highest type of initiative. But it must be an initiative that is responsive to leadership, one that is disciplined to work well and smoothly with others. Fliers no longer go out on lone-wolf missions. They fly in formation, and the pilot who breaks formation endangers the success of the mission and the other units of his squadron, each of which depends on the other for security in flight. Despite the laxity of discipline in the homes from which many cadets come, it is surprising to see how easily Army discipline is accepted by most of them. Disciplinary problems are few and minor. Like all Army men, cadets grouse a great deal; but that means that morale is high. They complain because they are convinced that there is a better way to do something, and what is more, they are the ones who can do it. As this is written, a perfectly drilled squadron of cadets is marching down the street past my office, singing the Air Corps song at their lustiest. These men are disciplined, and they enjoy it. Have we of the junior colleges helped our students to achieve the discipline that makes an ordered and happy life?

A second emphasis in Army education is on *skill*. These skills must have battle importance, of course. Many of them, however, are merely special applications of common tool subjects taught in our schools. The big soft spot is mathematics. A fellow instructor who has taught cadets for many months told me that the poorest of all preparation seems to have been done in the handling of fractions—plain fifth grade arithmetic. Fully *half* of the ground school mathematics course must be given over to a review of elementary arithmetic. Whereas only a small per

cent fail to get through other subjects, mathematics casualty lists run high.

The simple skills of soldiering—close and open order drill, guard, the manual of arms—are taught even to budding fliers. The cadet learns that he is part of a great organization. As he marches shoulder to shoulder with the other men, he gets the feel of the group engaged in a great common enterprise. He picks up infantry skills on the parade ground, and in the classroom he receives instruction in elementary tactics; much military flying supports ground force action. He learns elementary naval tactics; land-based aircraft are often called upon to support naval action. The cadet is learning how to work with other arms and services to achieve victory. For years the junior colleges have complained about rigid compartmentalization of subject matter. The universities have not been helpful in breaking down the walls of partition. The experience of the Army would seem to show that part of the trouble may lie in the professional outlook of the instructional personnel. In the Army, instructors are officers first, then instructors. Instruction is first of all a military formation, as much as a parade. Our job is to turn out soldiers first, then flying specialists. Unity of effort is the result. Should the junior colleges try to produce citizens first, then plumbers and scholars?

The building of *vigor*, abundant physical energy, is a third objective. Combat flying is a very taxing activity, and anything less than top physical efficiency makes the pilot a menace to his crew and his squadron. As a result, the Air Corps conducts a rigorous physical training program. Mass calisthenics, taught by the cadence system, insures rounded muscular development. Competitive athletics are of the

small-group, light-contact type, such as volleyball and six-man touch football. Alertness and dexterity are emphasized. All must participate. There are no sidelines or players' benches or glamorous exhibitions. The athletic programs of our junior colleges have long been designed to please the alumni, the townspeople, and the stadium bondholders. Have they made our youth more vigorous?

The program and organization of pre-flight training are simple. Half the day is given to classroom instruction in such courses as Organization of the Army, the Navy, and the Air Forces; Mathematics; Physics; Code; Recognition of Aircraft; Maps and Charts; and the like. The other half of the day is under the direction of the tactical and physical training departments. Lectures and films on military courtesy and preventive medicine are offered from time to time. Cadets who fail a final examination are given one make-up test. If this, too, is failed, the cadet is "held-over" for the next cadet class and repeats the subject. Only one hold-over is allowed throughout his entire flying training period. Failures are reclassified and placed in another branch of service for which they may be better qualified. After the completion of a nine-weeks' course, cadets go on to primary flying training.

The daily program is very full. As one cadet put it, "I never get to smoke more than three drags before the bugle blows for the next formation." Open post is given once a week—maybe. If the cadet has time, he can go to a post movie for 12 cents; and in this war, the soldiers see the new pictures first. A spacious cadet recreation building attracts many. However, unless the cadet is a facile student and adept at dodging "gigs"—gigs are demerits, and

a demerit means "walking the ramp" for an hour with gun on shoulder—he is not likely to have much time for extracurricula.

Underneath all of the training is a feeling that the time is very late—none must be wasted. The instructor feels this especially. He is preparing the cadet for the ultimate final examination in the sky. As the instructor stands before his class, he knows he must not fail. The responsibility for victory rests upon him in an awful way.

After all, though, this is true of all instruction, no matter where.

---

#### DR. BETHUNE RESIGNS

Dr. Mary McLeod Bethune, founder and for 31 years president of Bethune Cookman College, Florida, has resigned, and the trustees have named James A. Colston, director of Ballard College, Georgia, as her successor. They also named Dr. Bethune president emeritus of Bethune Cookman. Director of the Negro division of the NYA, Dr. Bethune plans to spend some time in Washington to work out changes in her part of that organization. Later plans involve organizational work for Negroes in Australia, Africa, and London.

Born in a cottonpicker's hut in South Carolina 66 years ago, Dr. Bethune educated herself and built a school now worth a million dollars. She has honorary degrees from five colleges, is president of the National Council of Negro Women and has three times won medals for achievement.

---

#### COMMANDO TRAINING

Physical education classes at Scranton-Keystone Junior College, Pennsylvania, are receiving "commando" training two hours each week.

## A Junior College Goes Totalitarian

JAMES CLARKE

**A**SK the average junior college student what he knows about totalitarianism and he will immediately launch into a discussion of the subject as he learned it from his history professor when a lowly freshman. Beyond this he knows little more about it than what he reads in the daily newspaper. There is one group of college students in this country, however, who have had a first-hand chance to study totalitarianism. They know now rather vividly just the situation that is faced by some of the European nations. This group is the student body at New London Junior College, Connecticut, who were subjected by their Student Council to three weeks of regimentation and totalitarianism during the past college year as an attempt on the part of the Council to overcome the apathy of the students toward their government.

The Student Council is composed of representatives from each of the various organizations in the college with two faculty advisers. Along administrative lines, the Council had done much since its organization. It had set up an athletic council to control athletics both

intercollegiate and intramural. It had sponsored several war relief parties, had sat as an honor court for disciplinary problems and had allotted funds to student organizations for their yearly budgets. The big problem which faced them from the outset, however, was that of the students' complacency toward their government.

During the first half of the academic year 1941-42, many suggestions were brought out at Council meetings to combat this apathy. Many were the hours devoted to discussion of the problem as the Council racked its collective brains to find a way to stimulate the students' interest in their government. The problem was doubly difficult as New London Junior College is a new institution (1941 was the third year of its existence); and thus having no experience to draw from and a reputation to establish, the Council had to be careful about any revolutionary methods it used for fear that the staid old New England town in which the college is situated might be shocked to the detriment of the college.

As the academic year 1941-42 drew to a close and the time for nomination and election of officers came near, the Council realized that if the rate of attendance at student government meetings that had been characteristic to date continued, elections would have to be postponed. It would be impossible to hold meetings, for the Student Government Constitution stated that a quorum should consist of two-thirds of the enrolled student body. Since attendance had been much below that, the Council realized that drastic steps were needed.

---

JAMES CLARKE graduated from New London Junior College, Connecticut, in the class of '42, and is at present attending the Medill School of Journalism at Northwestern University, Illinois. At New London he was manager of the Athletic Association, business manager of the student newspaper, a member of the Student Council, and Student Government Treasurer. At Northwestern he is also kept hopping, having recently been elected Director of Civilian Defense for the Student War Council. As if this, plus his studies, were not job enough for Jim's tireless energy, he also holds a part-time job at the Oak Crest Hotel in Evanston where he is a combination bell-hop, switchboard operator, and general helper.

After announcing the nominations two weeks in advance, they were held with barely a quorum present. The next week came the elections. After the ballots had been spread and marked, it was found that a quorum did not exist and that despite all efforts a quorum could not be obtained. Under constitution rules, therefore, the election was postponed a week. After this meeting an emergency gathering of the Council was held to solve the problem, which had now definitely come to a head. Again the wordy debates common to all democratic legislative bodies were indulged in, until all concerned became almost ridiculous in their suggestions. When it was suggested, however, that the Council take as precedent the methods of the foreign dictators and deprive students of their rights, this statement was picked up by several members and discussed till it became apparent that it had merit. They liked the idea and soon began figuring ways to put a dictatorial policy into effect.

The outcome of that meeting was a statement signed by the four senior members of the council announcing "the establishment of a dictatorship" by the four "to replace the previous government" and that they, "as the most experienced members of the student body, were assuming control and would, before their graduation, appoint their own successors." This bulletin further stated that there could be no appeal from this edict as the Student Council had made its decision and there was no appeal. Then the fun started. When the following day arrived, the student body learned of the decision and their reaction was voluble if nothing else. Angry voices were heard threatening reprisals, but nothing came of them. The original bulletin was posted about eight A.M. followed two hours later by a

supplementary bulletin setting forth some rather definite policies.

The Engineer's Club and the Girl's Chorus, the two largest groups in the college, were abolished for their "lack of any sizable contribution to the welfare of their members." All the Student Council members except the so-called ruling committee of four were dismissed and their offices assumed by the remaining members. A salute similar to that of the Nazi party was arranged to be accorded all members of the ruling committee. The newspaper of the college which had previously been under no censorship or other influence was placed under the control of the committee. The former levy of 20 per cent of all profits of student-run affairs was arbitrarily raised to 50 per cent.

The entire ruling committee momentarily expected to be deposed and run out of town, but nothing happened aside from those first muttered threats. The apathy had a firm hold. The committee then decided to take the situation fully in hand and totally convert the government to dictatorship since the desired results had not been achieved as yet.

This was done with another series of edicts which proclaimed the basis for a study hour to be rigidly enforced. Stopped was student participation in any intramural sports without the express permission of the committee and then only if the student had scholarship grades or was a member of the committee itself. This resulted in the locking up of horseshoes and ping pong paddles, used for two of the favorite diversions for the leisure hours of the students. Coupled with the complete ban on dancing and other social activities, this action resulted in stirring up feeling against the committee. At last the lethargy was beginning to be thrown off.

Soon an "Underground" movement

sprang up in the men's dormitory to ostracize the single one of their fellows who was a member of the committee. Arm bands were printed and were worn in defiance of the committee. Some of the more thoughtful students began to see parallels with the foreign situation and began to harangue their classmates. Meanwhile the committee, never relaxing a moment, brought out new edicts and enforced those already in effect. Startling to the faculty were the reactions of the students to the various orders which destroyed the previously democratic system and instituted in its place regimentation. These responses exactly mirrored the reactions of the nations of the world as they had been confronted with the Nazi menace. One student when approached by a member of the committee and told to turn off the radio was so startled that she did so immediately and afterwards exclaimed "Gee, they actually made me turn off the radio; this is terrible." Still another student told the committee that if it didn't stop its action he was going to withdraw from college. He had come to the college attracted by its democratic ways and if "they couldn't be maintained, he was going somewhere else where they could." Others asserted that "it can't happen here." Another faction said that if the situation went too far the faculty should step in and stop it. Little did they know that the faculty under the terms of the constitution could do no such thing and further than that they were completely in sympathy with the movement. The majority of the students gave vent to feelings comparable to the Balkan nations and simply assented peacefully to this domination and went about their business.

Finally at the last student assembly before the close of college, the committee decided to halt this dictatorship and

show the students the parallel with the world situation. When the first of the committee got up and told the story he was greeted by hee-haws and guffaws for trying to hoodwink the students. They of course "had known just what was going on all the time." After he told them the complete story and showed them incident for incident how their actions were just exactly those that led Europe to the slaughtering block, some of them began to grasp the significance of their apathy and what it meant to them as members of the United States. Shortly afterwards the elections were held in an awe of silence. When the formalities had been finished, the newly elected president went to the officers who were retiring and thanked them for showing him and the rest of the student body the lesson that they had learned and asked them to preside at a meeting where all the major faults of the government could be aired and a workable conclusion attempted. Today those new officers have met several times and feel secure within themselves that they are the leaders of a group that know the meaning of the word democracy because they have had it taken away from them.

This lesson of the Student Council at New London Junior College is one that every college faces and one which has perhaps not been given necessary weight in the schools of the country. Merely saluting the flag every morning and reciting the pledge of allegiance do not guarantee any knowledge of democracy. Only through practical problems and the meeting of all the exigencies of such a system squarely can democracy really be taught. The experiment at New London was probably more drastic action than needs to be taken in most institutions but it is only through deprivation that many people learn how much they once had.

---

## Health Program for a Junior College

VIOLA G. PFROMMER

**A**N integrated health program in a small resident junior college can be an exciting testing ground for democratic procedure in education as well as a motivating force in health service and education. Because we at Colby Junior College feel that we have been privileged in working out our small health unit on a coordinated basis, we should like to share our experience with others in the hope that it may be of interest and that return comments may aid us in reevaluating our endeavor.

Since we hold the premise that education, a way of living, is primarily concerned with the adjustment of the individual in the dynamic stream of life, we visualize all campus situations as opportunities for learning. Also, we believe that every member of the college community from the all-important food handler to the president is our concern. At the same time, we consider that guidance in health is the responsibility of every member of the faculty and administrative staff. At times, the faculty residents play a more important role in guidance than do instructors in chemistry, history, and other academic subjects.

### *Program and Organization*

Gathering momentum slowly, our health program has grown around our particular campus needs and local facilities. A glance at the diagram on

---

---

VIOLA G. PFROMMER has been chairman of the department of health and physical education at Colby Junior College, New Hampshire, since 1936. That year she also received her M. A. from Columbia University, and since that time has done summer graduate work at Columbia and at the Massachusetts Institute of Technology.

page 235 will show the organization and indicate that the program is determined not by two or three people or interests but by many and is administered under unified effort.

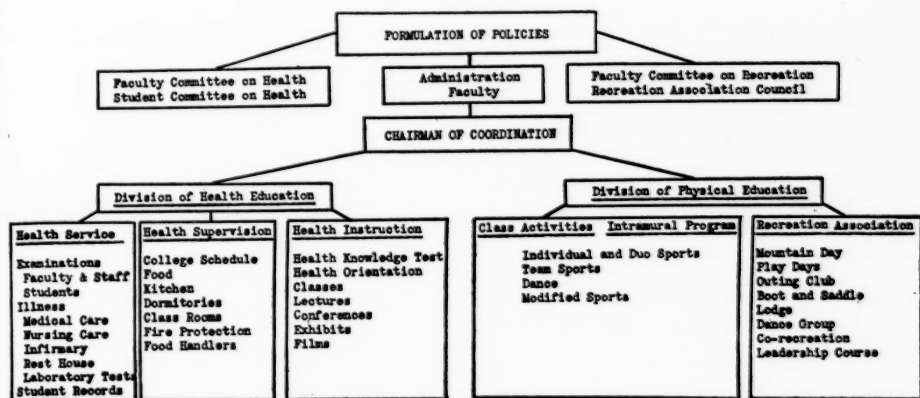

In this campus laboratory we realize the importance of maintaining some fluid means for the articulation of student health needs. This we attempt to do through the Student Committee on Health. Here opportunity is offered for learning from and with students as well as for providing them with mature judgment and an interpretation of the program. The Faculty Committee on Health meets bimonthly with the Student Committee, and monthly as a separate unit. This committee formulates policies, interprets the program to faculty and staff members, acts upon recommendations of the medical examining staff, and is guided by the college physicians who have membership in this group.

Cooperation with local and state agencies is given whenever possible. All staff members are affiliated with their state and national professional groups; the department holds membership in the American Student Health Association, American Public Health Association, the School Health Association, and the American Association of Health, Physical Education and Recreation. Thus, we aim to articulate student health needs, to formulate and interpret health policies under the guidance of medical men, to operate as an integrated unit, and to cooperate with local and state agencies.

### *Campus Public Health*

Because we know that the best in-

ORGANIZATION OF HEALTH PROGRAM AT COLBY JUNIOR COLLEGE

struction in the world, the best student health service, and the best recreational guidance are nullified by inadequate provision for real living, we attempt to provide health safeguards similar to those which are offered to communities by their local and state departments of public health. These include periodic inspection of water and milk, campus buildings, classrooms, fire escapes, ventilation, lighting, fire drill procedure. Necessary changes are made when deemed advisable. We provide annual health examinations for food handlers and staff members. We require a health examination of all faculty members upon acceptance and encourage periodic check-ups. Provision on campus is made for the care of students in case of epidemics and other emergencies. Consideration is given to the spacing of vacation periods and to student schedules. The hour from four to five o'clock is kept open for recreational activities and free from all academic and committee obligations.

#### *Student Health Service*

Our health guidance begins when a student submits her personal health history and health statement to the

Committee on Admissions. Upon acceptance, each student is required to submit a certificate of vaccination for smallpox. Here emphasis is placed on assisting rather than rejecting and on counseling parents in cases where conditions can be remedied. It is interesting to note that as a result of one pre-entrance examination parents of an applicant were informed by their physician that their daughter was suffering from a serious infection which necessitated immediate hospitalization and postponement of college for one year.

During the opening week of college our physicians meet with the entering students. They explain the "why" of examinations and the preliminary laboratory procedures such as blood counts, blood pressure, heart rate, urinalysis, vital capacity determination, posture picture, basal metabolic rate, electrocardiogram, and audiogram. The last three procedures, as well as X-rays, are done only when health histories indicate the need for such diagnostic aids; all other procedures are done for every student before the day of examination. Chest X-rays are taken of all entering students. The health statements and

health histories are reviewed by our physicians, and special needs and diagnostic aids are indicated before the day of the examinations.

On the night before the student health examinations the medical examining staff, which includes specialists for examinations and practicing physicians who conduct conferences, meet to consider the procedure as a whole, the educational implications, and the interpretation of specific sections. The following day they meet in their respective sections for student examinations of eyes, ear-nose-throat, chest-heart, abdomen, skin, and orthopedics. Immediately after the examination, students confer with the conference physicians who interpret and summarize the findings and reassure the apprehensive student when it is deemed necessary. We strive for confidence and rapport in this first meeting. We hope, too, that the thoroughness and quality of the examination will acquaint students with health examinations at their best and will make them more discriminating in securing medical service in the future. Through personal letters we inform parents and family physicians of the findings and recommendations of the examining staff. Family physicians and selected specialists take care of some of the follow-up recommendations. Others, of course, like postural exercises, restricted activity, conferences, are carried out by our staff. We give particular attention to dysmenorrhea and skin cases since these difficulties, which are all important to the adolescent girl, seem to receive little notice from the family physicians.

Within reasonable financial limits determined by the college we provide medical, nursing, and infirmary care and consultation for students during residence. The clinic is open during the

day and a nurse is on call during the night. We are fortunate in having in our small town three local physicians who are affiliated with the college. These men hold office hours at the clinic, thereby offering good service and permitting choice of physicians. Our infirmary is maintained at the local hospital about one-half mile from campus. The hospital is equipped for surgery, X-ray, and laboratory procedures. A rest house is available on campus for post-infirmary ambulatory cases and for those who need extra sleep and rest. Individual health records are kept, are used by our physicians, and made available to our faculty. Our examining medical and nursing staff view the examinations, the clinic, the rest house, and the infirmary as laboratories for learning. They treat as well as attempt to teach while the iron is hot. When there is a connection between illness and unconscious emotional disturbance, help from advisers and other faculty and administrative members is secured.

#### *Instruction in Health*

Since unrecognized intellectual snobbery and traditionalism in education are powerfully against specific courses in health education and because we have found that teaching health is primarily a personal matter, we generalize and particularize our instruction program. We try to point out the frontiers in the conservation of human resources that are open to the students. During orientation week a health knowledge test is given all entering students. This test we use in conference as a basis for directing reading and for motivating further study in other courses. Subjects for source themes often grow out of such conferences. Health orientation, a lecture-discussion course, which meets once a week during the first semester,

is offered to all entering students. This course deals with personal and community hygiene and is taught by members of the science department, physicians, and other members of the staff. Films are used whenever possible. Optional courses in first aid and home nursing are offered during the second semester of the first year.

Personal instruction is stressed in the pre-entrance and fall examinations, in sport activity and other classes, and in the dormitories. Faculty have been most cooperative in creating public opinion against those with colds who persist in coming to class. This year some fruitful teaching has resulted from studies on eating habits, smoking, sleep, time budgets, and recreational needs carried on by members of a research project in a business class.

The Student Committee on Health also serves as a focal point for real learning through their discussions, skits, bulletin board material, and exhibits. Just recently this group brought about a legislative change. As is true with college students, some of our girls, away from home for the first time, acquire the pernicious habit of burning the midnight and post-midnight oil. Last month when this habit became so obvious and when it seemed to have a marked relationship to the increase in the number of class hours lost because of illness, it was gratifying to note that it was the Student Committee that recognized the correlation and requested Student Council to curtail hours. This laboratory method of teaching may be expensive, slow, and bitter at times, yet it seems to hold much for students who learn by doing.

#### *Instruction in Physical Activities*

Our physical education division offers instruction in dance and in individual,

duo, and team sports. Classes are arranged on a seasonal basis, i.e. fall, winter, spring. Students classified as restricted are given first consideration in the scheduling of classes so that they will find activities such as archery and fishing open to them. Guidance in the selection of physical education activities is based not only on the findings of the health examinations but also on previous experience and interests. Optional posture clinics are offered for those who at the time of the fall examinations were given advice and exercises by our orthopedic examiners.

The Recreation Association Council provides competition in sports; this, while mainly intramural, culminates in each season with one intercollegiate game. The council also sponsors co-educational play days as well as play days for high school girls in this vicinity. Organizations represented on the Council such as the Dance Group, Boot and Saddle Club, and Outing Club offer opportunities for those students who are so inclined. The association also sponsors training in recreational leadership for students who go out into rural areas and for students who lead co-recreation on Saturday nights on campus. Students work in close cooperation with faculty members in planning and carrying out their programs.

#### *Conclusion*

We have had our discordant notes and pleasing chords as we have teamed together in working out this coordinated health and physical education program. We have not come far, yet we have seen our students learn in doing; we have learned with them; we have reaffirmed our belief that an integrated health program offers unusual laboratory experiences for learning; and we have strengthened our faith in the democratic procedure.

## *From the Secretary's Desk*

### EMERGENCY MEETING

An emergency wartime meeting of the American Association of Junior Colleges will be held at St. Louis, February 23-24, 1943.

The above announcement supersedes previous announcements of cancellation of the annual meeting. The September issue of the *Journal* announced the regular annual meeting of the Association in March. The October issue announced its cancellation on account of wartime conditions.

November 7 and 8 the Executive Committee met in Chicago and made a number of important decisions concerning the continuation of Association activities under wartime conditions. Subsequent to this meeting four of the regional junior college organizations, New England, Middle States, Southern, and California met and passed resolutions urgently requesting the Executive Committee to call an emergency annual meeting to consider the decisions made at the Chicago meeting of the Committee. In accordance with these requests the decision has been made to call the meeting as announced above.

Individual notices of the meeting have been mailed to all members of the Association. Important amendments to the Constitution will be considered. Vital decisions regarding the future of the Association will be made. It is hoped that there will be a large and representative attendance, even under wartime conditions, in view of the crucial decisions which must be reached at the meeting.

### THE JANUARY JOURNAL

The January issue of the *Journal* is drastically cut to permit publication of the *Junior College Directory 1943*. Most of the regular departments, including Reports and Discussion, Junior College Music, Book Reviews, and Bibliography on Junior Colleges, have been omitted. It is expected that these will be resumed in the February issue. That issue will also contain an analysis and summary of the more important facts and trends revealed by the data published in detail in the Directory in this issue. It is worth pointing out now, however, that in spite of wartime casualties among junior colleges the number of institutions reported this year only slightly less than last year. The total number of junior colleges reported in the 1942 Directory was 627; in the present 1943 Directory it is 624. Total enrollment for the first time exceeds 300,000.

### FIELD ACTIVITIES

On December 7 and 8 the Executive Secretary attended a meeting of the American Council on Education's Committee on Government and Educational Finance in New York. The entire time was spent in discussion and drafting a statement with reference to possible increased support of higher educational institutions, both publicly and privately controlled institutions, in view of changed and changing economic and social conditions.

He also participated in a number of committee meetings and special conferences in Washington during December.

## Wartime Activities

### RELOCATION CENTERS

Suited as the junior college would be to conditions in relocation centers for Japanese evacuees, it does not seem likely that it can be of much help—at least in California. Though the junior college would seem to be made to order for this assignment, both from its experience in technical courses and in community service, a ruling of the California State Department of Education has checked present plans. In a letter to the principals and directors of California junior colleges, dated October 21, 1942, the Department of Education ruled as follows:

Because no authority exists therefor, the governing board of a district maintaining a junior college is not authorized to send representatives to the relocation centers to act as educational advisers to the relocation centers in their proposals to establish post high school education.

Some concessions were made in this ruling to those junior colleges who had been interested in establishing extension or branch service in the relocation centers. They may evaluate and accept credit for work done in the centers, with teachers already present in the centers, on the same basis as work from unaccredited junior colleges, or private institutions. (And authorization is given for academic courses on an extension basis by the University of California). But the junior college can expect no recompense (on the basis of average daily attendance), for any work done by its teachers in evaluating or directing courses at the centers must be done in addition to their usual teaching load. As the individual junior college is not to direct curriculum, provide teachers, supervise class work,

make use of its library, or make use of the leadership of teachers with long experience of the American-Japanese, the appeal to its teaching staff is not likely to be very great. Legislation may be proposed in the next session of the legislature to make it possible to organize new junior college districts in the centers. But as income from taxation is low in the counties in which the centers are located, and as there has been some tendency in those areas to regard the American-Japanese more as foreigners than as Americans, it does not look at this moment as though the movement would get very vigorously under way.—O. D. RICHARDSON, *Los Angeles City College, Los Angeles, California.*

### PRENURSING AT VERMONT

Prenursing has attained a war priority rating in the curriculum of Vermont Junior College, and vocational counselors at the college are asked to be on the alert for young women who seem to possess the essential qualities that make a good nurse. Chemistry, biology, bacteriology and anatomy courses are filled with young women who are planning nursing careers aimed both at war service and to meet the demand that will apparently continue after the war because of resultant military and civilian casualties of all types. This year the entering class of student nurses at the local Heaton hospital have been taking their anatomy courses at the junior college under arrangements made between the administrations of the two institutions. The student nurses attend classes three semester hours a week.

### MT. VERNON LOSES PLANT

On December 15 the Navy Department took over the 33-acre plant of Mount Vernon Seminary located on Nebraska Avenue in Washington, D.C., to be used for "special training" purposes. This well known junior college for women, organized in 1875, has a staff of 46 members and the largest enrollment in its history. Fortunately President George W. Lloyd, who joined the staff in 1933, has been able to make arrangements to continue the institution in temporary buildings favorably located in a nearby section of Washington, even if its present commodious plan must be sacrificed to wartime needs of the government.

### FAIRMONT CLOSED

The Washington, D. C., plant of Fairmont Junior College was closed December 15 in order that its facilities might be used by the Australian Lend-Lease Administration. The announcement in the December *Journal* that The Casements, at Ormond Beach, Florida, had been taken over by the War Department needs modification. The Casements has been returned to the owner, Miss Maud von Woy, who was also president of Fairmont Junior College. Accordingly Miss von Woy has arranged to transfer the staff and student body of Fairmont to The Casements temporarily. The Casements was formerly the winter home of John D. Rockefeller, but was purchased by Miss von Woy in 1941.

### LOS ANGELES CPT

Los Angeles City College, California, is continuing its CPT program this year with 60 students in training at the college's aviation base at Lone Pine.

Here students will receive their fundamental flight training and ground school work preparatory to entering active service with the Army and Navy air forces. Fifty of the CPT trainees are in Naval Reserve V-5 class. The other 10 are enlisted in the Army Air Corps Reserve and will enter active service on completion of the course. Those receiving the highest ratings will go into the U. S. Ferry Command. The others will become flight instructors or glider pilots.

### "GOOD NEIGHBORING"

To meet the demand for increased knowledge and understanding of our neighbors in South America, Santa Monica Junior College, California, inaugurated this fall a course in Portuguese, the language of Brazil. The course is stressing preparation especially for Civil Service jobs as translators and interpreters of Portuguese, for the U. S. Army, and for businessmen and aircraft technicians who are preparing to enter commercial relations in South America after the war.

### HEALTH CLINIC

Herzl Junior College, Chicago, has a unique feature this year—a student health clinic operated by two regularly licensed physicians who are also on the teaching staff. Modern equipment includes the fluoroscope, basal metabolism machine, X-Ray, and ultra-violet lamps.

### WORTHINGTON ACTIVITIES

Worthington Junior College, Minnesota, opened this fall with almost all of its male population enlisted either in the Navy or Army Reserve. The college reports that airplanes fly overhead at all hours what with 10 Navy men and 22 Army men in training under

the college's CPT program. At 7:30 each morning every man in college is required to "harden up" in the physical education obstacle course. Many Worthington former students are serving actively in the armed forces. Seven former members of the faculty are in the Army, Navy, and Coast Guard.

### MOST POPULAR COURSES

Briarcliff Junior College, New York, reports that the most popular subjects in the student election of studies this year are courses directly contributory to the war effort, providing training on a through-going and practical basis in Automobile Mechanics, Topographic Drafting, Nutrition with special reference to rationing and wartime emergencies, Home Nursing, First Aid, and Medical Secretarial work. The college opened its academic year with a capacity enrollment of 136 students coming from 22 states.

### KEMPER HONOR ROLL

Kemper Military School, Missouri, has inscribed in bronze on its Honor Roll the names of nine former students who have given their lives for the country. One student was killed in action in the sinking of the U. S. S. Langley, one in the Battle of Java, three in airplane crashes, and four have been reported missing in action in the Philippines.

### DRIVE FOR NISEI

Collection of toys, games, scissors, and other equipment for the recreation of small children has been carried on by the Student Religious Center of Los Angeles City College for the Nisei children in the evacuation centers of Manzanar and Santa Anita.

### MARS HILL SERVICE MEN

Mars Hill College, North Carolina, has at least 163 former students now in the armed forces of the country. Every branch of the service is represented.

### TILTON ATHLETICS

Athletic activities at Tilton Junior College, New Hampshire, have been completely revamped in accordance with the Naval Aviation physical fitness program. Varsity sports schedules have been severely reduced, and the emphasis is upon intramural competition with opportunity for all to play on a class or club team. During the winter season, every student will have a full hour of calisthenics four days a week. Tilton's program will include by spring seven of the eight activities listed in the Navy manual: regular classes in boxing; military track, in the form of an obstacle course and hill climbing; football; basketball; swimming and life saving; gymnastics; and soccer. Gymnastics will stress rope climbing, chinning, and work on parallel bars.

### HARVEST HELPERS

California farmers needed help with their harvests this fall, so junior college students and instructors rolled up their sleeves and went to work. Students and instructors of Stockton Junior College, California, worked in tomato canneries four and more hours a night during October while continuing their college classes during the day. Others weeded gardens and worked in the fields and plant nurseries.

### VICTORY TOURNEY

Almost the entire student body of Virginia Interment College participated

recently in a "Victory Speech Tournament" sponsored by the public speaking, dramatics, and radio classes to stimulate students to think and talk more intelligently about the war and the post-war world, and to prepare them to give community programs on the war. Activities of the tournament included debates, extemporaneous speaking, radio skits and news casts, various types of reading, "Victory" group discussions and problem solving, and a variety of quiz programs. The tournament, lasting a full month, literally turned the campus upside down as students took complete charge in planning the events, judging contests, and promoting the various programs.

Other war activities at the college include appointment of a War Council to cooperate with the Office of Civilian Defense, and sweeping revision of all social science courses to relate directly to the war.

---

#### WAR LANGUAGE

Realizing the immediate need of knowledge of certain foreign languages, the Language Department of Pasadena Junior College, California, has organized groups to study Japanese, Chinese, Russian, and German. In these courses, no attempt is made to give the students a detailed knowledge of the fundamentals of grammar, but emphasis is placed on both oral and written mastery of useful words, phrases and conversational expressions. The basic list of material to be covered has been carefully selected after consultation with military, naval and aviation authorities. Every attempt has been made to meet the immediate needs of an American who finds himself in a foreign country during the war and reconstruction period.

#### JONES COUNTY WAR WORK

Jones County Junior College, Mississippi, is putting emphasis this year on the war aspects of its program with full flight training and industrial education provided along with its regular courses. For the first time also, all students will be required to participate in a physical education program, and the college's first physical education director for women has been appointed.

---

#### RICKER WAR PROGRAM

Ricker Junior College, Maine, is trying to fit into the national war program in every way that its situation in an agricultural community warrants. Students are allowed to elect extra subjects if they are able and willing to do the additional work. A course in meteorology is being given by the geology department. The courses in mathematics are being adapted to the demands of war industry. A course in radio has been arranged. The engineering department is offering courses in blueprint reading. The program of physical education has been expanded to give all students more rigid training for the rigors of armed service.

---

#### CPT ENLARGED

Highland Park Junior College, Michigan, began its second full-time, accelerated Civilian Pilot Training program this fall with accepting the training of 10 new naval fliers and 22 army glider pilots. During the summer, for the first time the college undertook to train 10 navy fliers and 10 army glider pilots on a full-time basis. If the present program continues on this basis every two months, Dean George Altenberg points out, within a year the junior college will have trained 192 new pilots in addition

to the 106 previously trained, most of whom have already entered the service and now hold commissions.

### WAR-JOB TRAINING

Rochester Junior College, Minnesota, is cooperating closely with the local Defense Council in developing war-job training programs. The college offered a refresher course for stenographers and typists during the summer months, and is now giving a course in radio technology in cooperation with the University of Minnesota, and ground instruction for the glider training program of aviation cadets for the U. S. Army Air Corps.

### 140 STUDY, 140 SERVE

Central Junior College, California, has a present enrollment of 140, and a list of 140 former students now in the armed forces. Thirty-one have received commissions in aviation; 13 have commissions in other branches of the service; one flyer has received the Distinguished Service Cross; another, a Silver Star.

### FACULTY ON LEAVE

Thirty-one members of the faculty of San Francisco Junior College, California, are on leave from their regular duties this year to enter military and other government service. Sixteen men are in military service; seven are with various government agencies as civilians; three are doing special research work for the government; others are assisting in Federal training programs or in other capacities. Miss Phebe Ward, coordinator of the terminal education project at the college, has taken an extended leave to organize a new personnel classification for the Ryan Aeronautical Laboratories.

### RADIO PLUS ACADEMIC WORK

Radio training and work experience in combination with academic work are being offered for the first time this year at the Southern Branch of the University of Idaho. Plans call for assigning young men and women for approximately 20 hours a week in work experience in radio. This consists of some code, construction and repair of radios and other related radio instruments. The related training which the student will take from the regular academic departments includes engineering, mathematics, electrical construction, physics and physics laboratory or engineering physics and laboratory. For this related training students will receive regular academic credit.

### "WAR OPPORTUNITIES"

Los Angeles City College, California, is publishing a series of bulletins entitled "War Opportunities for Students" which give in simplified form information for both men and women on how to enter the various branches of the armed forces and Red Cross foreign service.

### SAN BERNARDINO CPT GRAD

The *San Bernardino Sun* recently published a thrill-packed letter from a graduate of San Bernardino Valley Junior College, who is now an ensign flying in the southeastern Solomon islands for the Naval Air Corps after earning his wings through the junior college's CPT program in September 1941. The young man is Ensign Robert E. Dimmitt whose masterful handling of a Navy patrol plane, which was attacked for 30 or 40 minutes by seven Japanese Zero planes that riddled it with machine gun bullets, brought the ship to safety on an isolated island where the crew managed to live until it was found seven days later

by another Navy patrol plane. A brief excerpt from Dimmitt's letter is indicative of the dramatic combat in which the junior college graduate was engaged.

One of their [Japanese] shells set a bunch of flare shells on fire right by my side and I had a lot of fun putting them out. Our rudder cable on the port side was shot away as was our port flipper cable—cannon shot. We counted 12 cannon holes in our plane. Our rear gunners were really on the ball and the guns never jammed. Our starboard gunner peeled the wing off one of them and our port gunner set one on fire, so we definitely got two of them. They broke off from us after 30 or 40 minutes so they never saw that our port engine quit. Lucky for us . . . I'm glad I've had such an experience now that it's over, but while it was happening, well, we were all plenty scared.

#### ATHLETICS SUSPENDED

Intercollegiate championship competition in athletic contests has been suspended for the duration by the Northern California Junior College Association.

#### MODESTO WAR CLASSES

Modesto Evening Junior College, California, has already given mechanical training to over 2,000 people since Pearl Harbor. Instruction is offered 24 hours each day, six days a week in pre-employment training in aircraft engines, aircraft mechanics, aircraft sheet metal, machine shop, radio repair, maintenance and welding.

#### DEATH OF REV. RHYNE

The Rev. Hugh J. Rhyne, president of Marion College, Virginia, and Secretary of the Lutheran Synod of Virginia, died November 13. Dr. Rhyne who had held pastorates in the Lutheran churches of Baltimore, Md., and Marion and Salem, Virginia, became president of the college in 1938.

## Journal of Higher Education

**THE MAGAZINE FOR  
LEADERS IN COLLEGIATE  
EDUCATION**

**Subscription \$3 a year**

**OHIO STATE  
UNIVERSITY**

**COLUMBUS**

For the past twelve years the Journal has been recognized as the leading magazine devoted to matters pertaining to the different areas of higher education. The contents of each issue are varied. The prospectus for the year's issues contains discursive articles, reports of research, and criticisms of current practices. We believe that professors and administrative officers, when once subscribers to the Journal, will find it so satisfying that they will not wish to be without it.

## Junior College Directory, 1943

Compiled by

WALTER CROSBY EELLS

Executive Secretary, American Association of Junior Colleges

**T**HIS Directory contains information concerning all junior colleges in the United States which have been reported to the Washington Office of the American Association of Junior Colleges up to December 18, 1942. This list is meant to be inclusive rather than exclusive and therefore it contains the names of some institutions which may be doing relatively little junior college work. It omits, however, a number of institutions that give work of college grade but are not organized on a junior college basis, as well as several normal schools and teachers colleges listed in previous issues of this Directory. It includes separately organized junior colleges, general colleges, or lower divisions of four-year colleges or universities only in case they are active members of the American Association of Junior Colleges. Whenever an institution has so requested, its name has been omitted from the list. Institutions for whom no information was reported in the 1942 Directory have been dropped from the 1943 Directory unless new information has been secured to justify the retention of their names this year. The data here included have been taken from reports received in the autumn of 1942 directly from some responsible officer of the junior college named, except as otherwise indicated. Credit is due Marion Anello and Winifred Long of the Association office staff for the detailed work of collecting and assembling the data on which the Directory is based.

For explanation of terminology and symbols, see following page. For a summary of certain features by states and type of control of the colleges, see page 247.

## EXPLANATIONS

The following explanations will aid in a more intelligent use of this Directory:

**Administrative Head.** In branch junior colleges a question sometimes arises as to whether the president of the parent institution or the dean of the local junior college should be considered the administrative head. In many public junior colleges, organized as parts of city school systems, a similar question concerns the city superintendent of schools and the dean or principal of the junior college. In all such cases the institution's own designation of its "administrative head" has been accepted, even though uniformity is thereby sacrificed. The administrative head, as stated, presumably is the individual to whom general correspondence concerning the institution should be addressed. His official title is indicated following his name.

**Accreditation.** Three types of accreditation, or equivalent approval or recognition, (State Department, State University, Regional Association) are indicated by appropriate symbols, arranged in order:

D—State Department of Education; Board of Education in the District of Columbia; junior college accrediting commission in Mississippi.

U—State University, State College, or equivalent institution in states which do not have a state university; or by state college association or equivalent organization.

Accreditation by or membership in one of the regional associations of colleges and secondary schools.

E—New England Association  
M—Middle States Association  
N—North Central Association  
S—Southern Association  
W—Northwest Association

Affiliation with the Catholic University of America or the University Senate of the Methodist Church is indicated for institutions not otherwise accredited.

**Type.** Three main types are distinguished—coeducational, for men only, and for women only, indicated by the initial letters, C, M, and W, respectively. Negro junior colleges are shown by (N) following the name of the institution.

**Control.** The primary basis of classification, as commonly recognized, is two-fold: institutions *publicly controlled*, and institutions *privately controlled*. The first group is sub-

divided into state, district, and local junior colleges; the second into those under denominational control or affiliation, non-denominational nonprofit institutions, and proprietary institutions. The following abbreviations are used for the denominations indicated:

A. M. E.—African Methodist Episcopal.  
A. M. E. Z.—African Methodist Episcopal Zion.  
Breth. Chr.—Brethren in Christ.  
Ch. of Chr.—Church of Christ.  
Cong.-Chr.—Congregational and Christian.  
Ev. M. C.—Evangelical Mission Covenant.  
Fr. Meth.—Free Methodist.  
L. D. S.—Latter Day Saints (Mormon).  
Pent. Hol.—Pentecostal Holiness.  
Presby.—Presbyterian (Northern).  
Presby. S.—Presbyterian (Southern).  
Ref. Ch.—Reformed Church in America.  
7th D. Adv.—Seventh-day Adventist.  
Un. Breth.—United Brethren.  
Wes. Meth.—Wesleyan Methodist.

**Year Organized.** Each institution was asked to report the year it was organized as a junior college. In some cases, however, it is evident that there has been reported instead the date of origin of an institution of same or similar name which has since developed into a junior college. Dates prior to 1900 should usually be interpreted in this way.

**Enrollment.** Note that enrollment data are usually given for the previous complete year, 1941-42. In a few cases of newly organized institutions enrollment for 1942-43 is given. Under "special" students are included day students taking less than a normal load; students in late afternoon, evening, and extension courses; adults in special courses, summer school students, etc.

**Faculty.** Note that number of faculty members unlike number of students, is given for the current year, 1942-43, in two classes, full-time, and part-time.

**Membership.** Membership in the American Association of Junior Colleges is indicated by a symbol preceding the name of the institution: an asterisk (\*) for active members; a dagger (†) for associate members. Active membership is open to any junior college which has received any of the types of accreditation or equivalent recognition indicated in the explanation of "accreditation" above. Associate membership is open to newly organized institutions and others which have not yet received such recognition.

The American Association of Junior Colleges does not itself act as an accrediting agency.

Publications—*Blue and Gold*, published annually; *Zeta Sigma Pi News*, published monthly

Inquiries should be addressed to the executive secretary

### **Social Organizations**

#### *National Junior College Panhellenic*

A federation of the national social sororities in the junior college field

Organized—1914

Executive Chairman—MRS. ANTHONY E. BOTT, 1317 Pennsylvania Avenue, East St. Louis, Illinois

Secretary-Treasurer—MARY CATHERINE BORK, 10010 Newton Ave. (Apt. 306), Cleveland, Ohio

Standing committees, with chairmen as follows:

Eligibility and Nationalization—MRS. HAROLD E. ERF, 429 N. Lombard Avenue, Oak Park, Illinois

Publicity—MARY CATHERINE BORK, 10010 Newton Ave. (Apt. 306), Cleveland, Ohio

Scholarship Standards Survey—MRS. ANTHONY E. BOTT, 1317 Pennsylvania Avenue, East St. Louis, Illinois

Social Conditions on Campus—MRS. WILLIAM H. RANDALL, 1922 Rolston Street, Independence, Missouri

Publication—*The Panhellenic Bulletin*, published annually

Inquiries should be addressed to the executive chairman

#### *Eta Upsilon Gamma*

Organized—1901

Existing chapters—7 active; 10 alumnae

President—MRS. HAROLD E. ERF, 429 N. Lombard Avenue, Oak Park, Illinois

Secretary—MRS. WILL K. NORTON, 495 Ockley Drive, Shreveport, Louisiana

Publications—*The Adamas*, published annually; editor, MRS. SIM B. COMFORT, 5638 Kingsbury Avenue, St. Louis, Missouri;

*Pledge Information*, published annually; editor, MRS. HAROLD E. ERF

Inquiries should be addressed to the president

### *Kappa Delta Phi*

Organized—1921

Existing chapters—two active; seven inactive  
President—MARGARET PERROTT, 170 3/4 S. Washington Street, Tiffin, Ohio

Secretary—ANN L. MAMMELE, 2714 Harrison Street, Wilmington, Delaware

Publications—*The Torch*, published biennially; *The Eagle's Wing*, published quarterly; editor, MARY CATHERINE BORK, 10010 Newton Ave. (Apt. 306), Cleveland, Ohio

Inquiries should be addressed to the president or to the secretary

### *Phi Sigma Nu*

Organized—1927

Existing chapters—three active; one alumni  
President—EDWARD R. MCGUIRE, 2534 West 83rd Street, Chicago, Illinois

Secretary—B. NISLE MEYER, 11 Forest Road, Verona, New Jersey

Publication—*The Phi Sigma Nu*, published semiannually; co-editors, SHERMAN KEELY, JR., 1052 N. Harding Avenue, Chicago, Illinois, and ROBERT KINN, JR., 4918 N. Wolcott Street, Chicago, Illinois

Inquiries should be addressed to the president

### *Sigma Iota Chi*

Organized—1903

Existing chapters—18 active; 12 alumnae

President—MRS. ANTHONY E. BOTT, 1317 Pennsylvania Avenue, East St. Louis, Illinois

Secretary—MISS LOIS JAMES, 43 Hillside Terrace, Belmont, Massachusetts

Publications—*The Parchment*, published quarterly; editor, MRS. ROBERT TOWNE, 303 Perry Road, Marshall, Texas; *The Scroll*, published five times a year; editor, MISS LOIS JAMES

Inquiries should be addressed to the president

### *Zeta Mu Epsilon*

Organized—1921

Existing chapters—three active; three alumnae  
President—MRS. RUSH D. HOLT, Weston, West Virginia

Secretary—MRS. T. T. MACLIVER, 738 W. Baca Street, Trinidad, Colorado

Publications—*The Evergreen*, published annually; *Zeta Mule*, newsletter, published annually; editor, MRS. J. M. MASTON, Hawesville, Kentucky

Inquiries may be addressed either to the president or to the secretary

# AMERICAN COLLEGE BUREAU

28 E. Jackson Blvd., Chicago, Illinois

Administrators in the educational field in all states, from Maine to California, are requesting that we recommend teachers for various types of positions on their staffs. This year there is a greater need for men and women in the teaching field than there has been for more than a decade. Because of the increasing number of men in the service, some colleges find themselves overstaffed in some departments and understaffed in other departments. Some universities and colleges are gladly giving leaves of absence to some members of their staffs, while in other departments they are having to secure new teachers. Many of the positions are permanent, and many are for the duration.

In our office here we find that both executives and teachers are trying to take care of the adjustments necessary. Once more the demand for teachers is greater than the supply. We welcome new registrations of teachers, that we may continue to meet the demand.

The American College Bureau is staffed and equipped to serve the executives who need to fill positions, and to serve those in the educational field who are looking for positions of advancement.

## Our Service is Nation Wide

(The American College Bureau, which exists primarily for university and college work, is closely affiliated with the Fisk Teachers Agency, at the same address, which in addition to its college department has strong grade and high school departments.)

## *The Study of the Physical World*

The ideal course for your pre-induction students: This new book offers a sound course in physics plus subjects not in physics, such as meteorology, navigation, explosives, as background for *any* specialist training course. Study aids, reading lists and more than 500 illustrations add to the value of the book.
